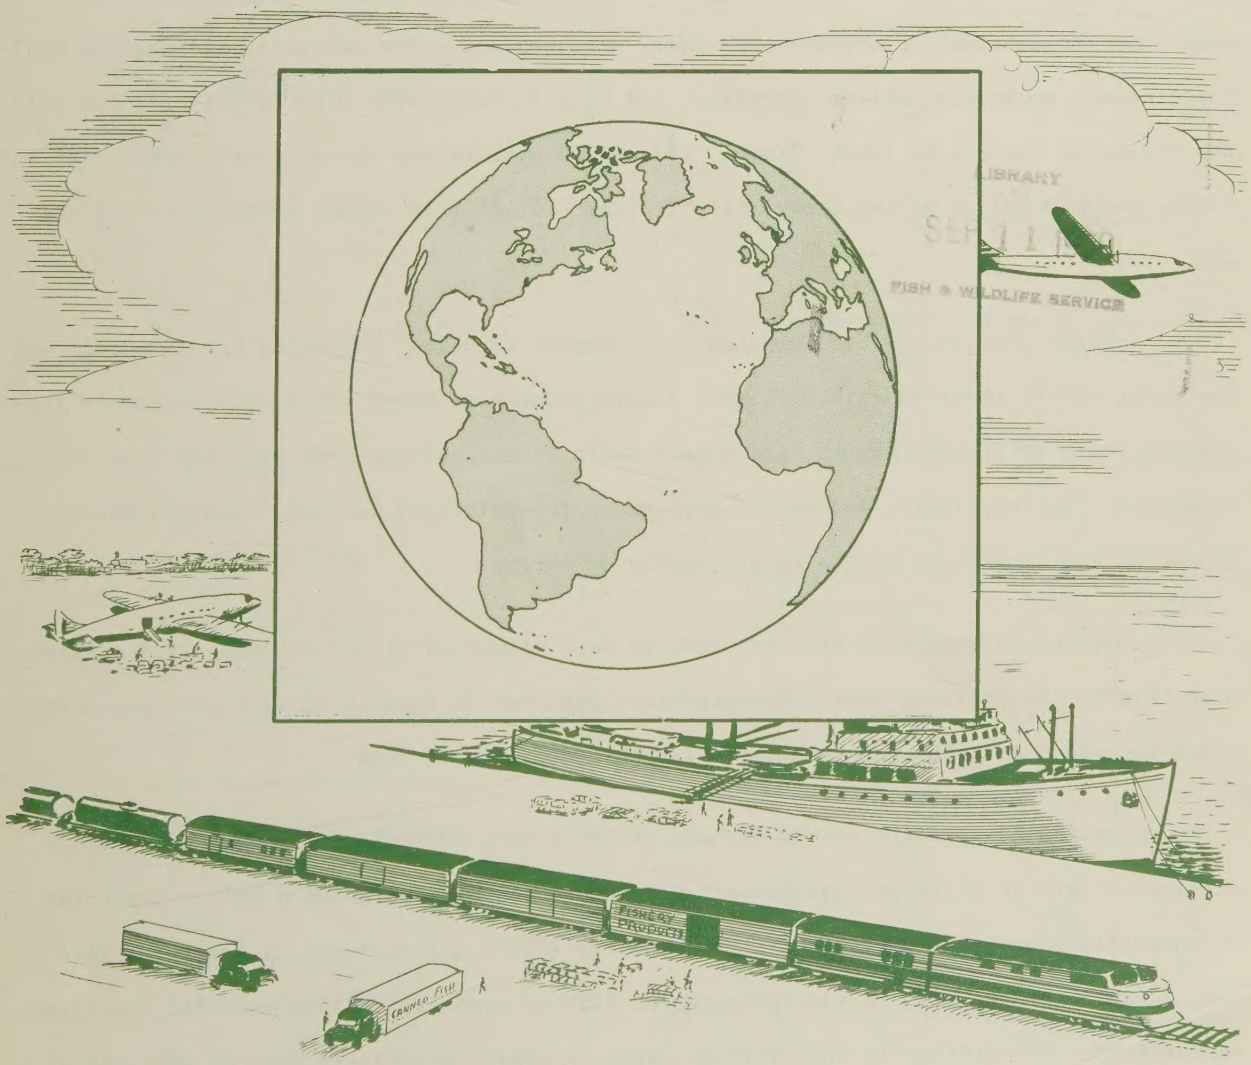
Annual Summary

1967-68



Foreign Trade

United States trade in fishery products was worth $890.4 million--an increase of $100.3 million compared with 1967. Imports for consumption were worth $822.7 million and exports, $67.7 million--a gain of $114.8 million in imports but a decline of $14.5 million in exports compared with the previous year.

Imports of edible fishery products were 1.7 billion pounds worth $643.2 million--18 percent more in volume and 19 percent more in value than in 1967. Increased receipts of fresh or frozen sea herring, tuna, halibut, fillets and steaks (including groundfish and other than groundfish), crabs and crab meat, northern and spiny lobsters, shrimp, and scallops; canned anchovies, salmon, sardines, and tuna in brine accounted largely for the gain. The volume of imports of fresh, frozen, and canned oysters and oyster juice, tuna loins and discs, and pickled or salted sea herring declined slightly in volume compared with a year ago.

Shrimp, the major item imported with respect to value, accounted for 25 percent of the value of all imported edible items. Record imports of about 189.5 million pounds (including fresh or frozen, canned, and cured) worth $162.2 million were received from 79 countries. Mexico, India, and Panama were among the principal sources. Mexican shrimp accounted for 32 percent of the total imports of shrimp.

Imports of nonedible fishery products were valued at $179.5 million--$9.9 million more than in the previous year. The principal gain was in imports of fish meal and scrap which increased from 651,000 tons in 1967 to 855,000 tons in 1968.

Exports of domestic edible fishery products were 90.8 million pounds worth $56.8 million--a decline of 16 percent in both volume and value compared with 1967. The value of nonedible exports of domestic fishery products ($10.9 million) was $3.8 million less than a year ago. Exports of foreign-produced fishery products in 1968 were $12.7 million compared with $20 million in the previous year. A sharp decrease in exports of fresh or frozen shrimp products--from $16.6 million in 1967 to $8.9 million in 1968--was the principal cause of the decline.

As the Nation's principal conservation agency, the Department of the Interior has basic responsibilities for water, fish, wildlife, mineral, land, park, and recreational resources. Indian and Territorial affairs are other major concerns of America's "Department of Natural Resources."

The Department works to assure the wisest choice in managing all our resources so each will make its full contribution to a better United States—now and in the future.
